LIGHTWORKS offers integrated product solutions for performance lighting applications through our global network of manufacturers and suppliers.

We specialize in exterior and interior custom architectural lighting solutions that embrace both technology and design. We engineer and supply integrated dimming and control systems for a diverse range of projects and applications.

Our experienced Product Sales Group is dedicated to assisting the design, specification and construction community in the creation of exciting and sustainable projects. That commitment is demonstrated by providing responsive service including product recommendations, applications engineering, mock-ups, budgeting, procurement, project management and field project services to ensure full realization of the design intent.
